### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6, line 3: "the deformer roll" lacks proper antecedent basis.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker et al. (US 5,471,817).

- With respect to claims 1-4, Baker discloses a method of packaging air bag that meets all of applicant's claimed subject matter; in particular, the method of Baker comprises the steps of: folding the air bag (63) into a roll by rotating horizontal arms (34 & 35) of a rotating assembly (24) (FIGS. 14A & 14B), deforming the roll by urging a pair of vertical wall (48, 49 & 50) of an insert assembly (15) into contact with an exterior of the roll such that the roll includes a plurality of "C" shape regions (FIGS. 16 & 17), and packaging the deform roll in a retainer (62).

Art Unit: 3721

- With respect to claim 5, the vertical walls (48, 49 & 50) are considered to be equivalent to the claimed rod or axle.
- With respect to claim 6, the vertical walls (48 & 49) are in contact with the roll during the packaging step and are later withdrawn from the roll (FIGS. 19 & 20).
- With respect to claims 7 & 8, the vertical walls (48, 49 & 50) form a generally “U” shape that holds and insert the roll into the retainer (62) and the vertical walls are withdrawn from the retainer. (FIGS. 19 & 20).
- With respect to claims 9-11, the package of air bag (63) is substantially rectangular (FIG. 22) and the outermost “C” shape region having a major axis that is substantially parallel to the major axis of the rectangular package and the inner “C” shape regions having major axes that are substantially perpendicular to the major axis of the rectangular package.
- With respect to claim 12, the retainer (62) is considered to be a wrapper and the method of Baker include the step of wrapping the wrapper (62) around the roll.

### ***Conclusion***
